You are correct in that we need more Sheer line Jul 7, To define a standard sheer, draw a line parallel to and above the DWL at a distance representing the minimum freeboard at amidships. At the forward perpendicular (FP) mark a Sheer? May 3, Sheer has nothing to do with how a boat performs except where high ends or low freeboard factor in. Of course, with angled sides, beam is effected, so it is wider if the sheer is I need some advice on a sailboat Jun 27, I was driving through a neighborhood when I notice a small boat leaned up agents a tree in the middle of some other trash. I stopped and knocked on the 2.3 The Traditional Way to Represent the Hull Form2.3.1 The Half-Breadth Plan The bottom of the box is a reference plane called the base plane. The base plane is usually level with the keel. A series of planes parallel and above the base plane Large Angle of Stability with Maxsurf Jun 3, TANSL Senior Member What you need if to clearly define the volume that serves as buoyancy reserve. Talking of Maxsurf, if you have an open space, the application tries to close Mirabaud-Super Foiler- Jul 10,
