Huawei Energy Storage Equipment Agent

What makes Huawei a good battery management company? Offering innovative battery management solutions, Huawei has placed emphasis on safety and performance optimization. Batteries are the heart of every storage system and are also subject to risks such as over- and under-discharge or over- and under-temperature. What is Huawei C&I storage? Huawei's C&I storage systems are certified for both low voltage and medium voltage grid connection and are redefining the ESS landscape, together with the LUNA2000 series and with Smart PCS LUNA2000-100KTL-M1 100 kW converter. Offering innovative battery management solutions, Huawei has placed emphasis on safety and performance optimization. What is energy storage system products list? Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. How many machines can be installed in a Huawei C&I system? These storage systems are very flexible, up to 5 machines can be installed in the same system, in this way there is scalability from approximately 97 to 970 kWh in steps of 30 kWh. The combination with string inverters from the Huawei C&I segment occurs naturally with a single supervision system. Does Huawei offer a warranty? The fine automatic calibration of the SOC (State of Charge) guarantees safe and reliable operation over time. Huawei offers an excellent 2-year basic warranty, extendable up to 10 years with advanced warranty. Do Huawei inverters need an isolation transformer? Huawei's previous series inverters are treated as third-party inverters, resulting in the need for the addition of an isolation transformer. The isolation transformer is also necessary when you want to use the ESS in the event of a blackout in backup mode since the PCS has a 3-wire connection without neutral.
