### N'Djamena outdoor inverter

Can inverters be installed outside? As a rule, inverters designed for outdoor use may be installed either outdoors or indoors, however indoor inverters can only be installed indoors. The great majority of grid-tied or string inverters available today are designed for outdoor installation. Are solar inverters waterproof? Hence, it's vital to ensure an outdoor inverter is waterproof, or at least highly resistant to water and moisture. Solar inverters can endure cold, but not the problems often accompanying frost and snow, such as water ingress and damage from falling icicles. Position the inverter accordingly and provide winter protection if necessary. Where is the inverter located? For homes, the inverter will most likely be in a garage, or along the side of the house near the meter box. For businesses, the inverters will also be near a sub board or main switch board. These are rarely located in areas where staff or clients will frequently be around. How to choose a site for installing an inverter? When choosing the site for installing an inverter, it is essential that the environmental conditions specified by the manufacturer be maintained. There are both temperature and humidity requirements for these devices. Where should an inverter be installed? As mentioned above, your inverter will usually be installed near a sub board or main switch board. When the inverter is installed outside, they are not usually very visible from the roadside of properties. For homes, the inverter will most likely be in a garage, or along the side of the house near the meter box. Should inverters be shaded? Thus, even inverters that incorporate robust outdoor packaging should be kept shaded, even if it means installing an awning over them. The ideal installation site for inverters is cool, dry, dust-free and indoors.
