One-to-one micro inverter

One of the key considerations in this journey is the selection of the right inverter - the heart of your solar system. The choice typically boils down to two main options: String inverters and Microinverters.

String inverters: are the OGs. They connect a bunch of panels in a "string" to one central unit. They're cheaper, but if one panel slacks off, the whole system slows down. Like [Micro Inverters \(Everything you need to know\)](#) Jun 10, 2018.
