

Solar System Simple

Solar System Simple

It consists of our sun and eight main planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune. There are also moons, dwarf planets, asteroids, comets, rocks and dust.

15 Solar System Facts For Kids What Is The Solar System? Solar System Facts For Kids Related Reading We live on a planet called Earth. There are other planets in space near ours. Some are smaller and some are much bigger. All of these planets travel in circles around the Sun. Each planet travels in its own lane that we call an orbit. Like in a race when you are running and each person has their own lanes and they can't cross tSee more on littleastronomy
