How to choose a PV inverter? When selecting an inverter, it is essential to ensure that its maximum DC current specification meets the requirements of thin-film modules. The current of each MPPT-connected PV string should remain below the inverter's DC current limit to prevent overcurrent damage. Which solar inverter should I Choose? String inverters are cost-effective; micro inverters and hybrid inverters offer long-term performance and monitoring but at a higher upfront price. Consider 3-5 year ROI based on local utility prices and solar subsidies. Your inverter choice should be based on site-specific needs: What are the different types of solar inverters? Let's start by comparing the main types of solar inverters.

1. Grid Connection Type Grid-tied systems use string or hybrid inverters; suitable where power is stable. Off-grid systems need hybrid inverters with reliable battery integration. Hybrid setups offer backup during outages and optimize solar usage even when the grid is up.
2. Power Demand What are the critical indicators on the PV side of an inverter? In previous editions, we discussed two critical indicators on the PV side of an inverter: the maximum over-sizing ratio and the maximum PV input voltage. Now, we will take a deep dive into the remaining parameters on the PV side, analyzing them one by one. How do I choose a solar inverter? thlinksolar recommends sizing the inverter at 125% of expected daily usage to cover surges and future growth.
3. Environmental Conditions Dust, humidity, heat, or partial shading all affect performance. Micro inverters handle shade better; string and hybrid require open, sunny areas. Choose inverters with IP65+ protection in harsh environments.
4. What happens if a PV inverter reaches a maximum current limit? The inverter's DC input current should always stay within its maximum limit. If the PV module's output current exceeds this limit, it may lead to current-limited operation and potential inverter damage, reducing power generation efficiency and return on investment.
